We set new trends

Prosperplast's mission is to develop practical, useful and aesthetic products. Our products have an advanced design, which is consistent with the trends in global markets.

We are design pioneers. The consecutive product lines set standards for the aesthetic appearance of homes and gardens. At the same time, our new collections aim to provide functionality for convenience.

Visit our new website

Discover us

„Making the right and informed decisions - combined with production technologies and continuous innovation have led to Prosperplast's rapid growth.

We think forward and ahead of time, so we can develop the best products on the market.

With the growth of technology and continual evolution of consumer demands, our online presence had a makeover, so we can serve our B2B clients and help our B2C customers in a better online environment. Developing our new website we had three core objectives: to interest, inspire and educate. We can proudly say we have achieved all three goals and will continue growing our online platform to support our current and new customers on daily basis.

Our product offering is growing, so is our virtual world! Sign up to the Newsletter on our website to stay up to date with news from our Prosperplast world."

A round flowerpot with a textured surface, reminiscent of hand-made woven products made from dried grasses.

The ornament on the surface of the flowerpot refers to the style of Far East design. An element that complements interior design and introduces an oriental character to any space.

EMBRACE NATURE

A modern system of vertical gardens brings an extremely attractive aspect of nature into the interior and the surroundings, creating contact with nature without leaving your home and improving indoor air quality.

Modular systems attached to the walls in various configurations create spectacular green displays.

Available in a hanging version and a portable version with a drainer.

Thanks to the flow-through irrigation system, the plants are evenly supplied with water. Its excess is discharged to a saucer or drainer.

The set does not include the water distribution system.

A series of round, oblong Lace flowerpots was created with an intricate openwork lace motif, in response to the trend promoting traditional folk design. Intentional simplicity of nostalgia for years gone by...

The Tree collection was created in response to the idea of the currently popular eco trend. The cellular structure of the plants was the inspiration for the openwork decoration of the pot. Simple and harmonious, available in round and oblong versions.

Agro resembles traditional terracotta pots. Both in a set with a tray and a hook, which can be easily dismantled and turned into regular standing flowerpots.

The classic form of the Pro pot is accented with delicate embossing on the surface and a slightly curled edge.

The shape of the pots is inspired by antiquity and its love for perfection and harmony. A decorated foot and a delicate ornament on the goblet form their unique character. The flowerpots will give a unique, truly royal character to every garden.

The Misa flowerpot resembles ceramic pots, a delicate ornament and a subtly textured surface adds to its elegance and grace.

The simple, timeless design makes it a perfect match for any garden or interior. The flowerpots are a perfect imitation of traditional clay products, but unlike them, they do not break easily. They create a perfect set.

A classic flowerpot shape with a delicately curled edge will work in any home décor, additionally decorated with a delicate ornament.

Terra plant pot from our trusted Terra Family line is an ideal choice for lovers of simple and classic designs. The product is universal and very durable.

Discover

Milly collection

A trendy flowerpot with a modern cylindrical shape narrowed at the base. Its elegant proportions make it a perfect match for many interiors, especially those decorated in boho style. Equipped with an insert, it does not require full filling with soil. Thanks to the handles, you can easily remove the insert and gain access to the inside of the flowerpot.

A miniature, portable greenhouse or original box with legs made of hard, light-coloured wood. Equipped with a transparent lid with adjustable ventilation openings. A combination of functionality and timeless elegance.

plant herbs to enjoy
tally fresh each day!

The portable seedbed collection from the Respana collection is an important part of the gardening backyard and a perfect solution for growers who face difficult climatic conditions. This miniature greenhouse which, does not take up much space at home, creates the perfect conditions for the growth of the seedlings through good ventilation and humidity control. Cultivation of early vegetables, herbs or warm weather-loving plants sensitive to weather conditions - can be continued regardless of weather condition outside and bringing a great joy of early harvest. The light transparent lid provides adjustable ventilation holes in order to create an ideal micro-climate and prevent from overheating plants. What is more it protects the seedlings from annoying insects.

Thanks to innovative Gikabe quick-water system you don't have to waste your time on filling a bucket or watering can in a traditional way. All you have to do is press the button in the tank and the watering can or bucket will fill with water immediately.

GARDEN CELLAR

A garden cellar as an additional space for storing food, maintaining a stable, relatively low temperature.

The temperature conditions in the underground cellar make it possible to store preserves, fresh vegetables, as well as wines.

Thanks to this, the cellar provides us with measurable economic benefits, such as a significant reduction in electricity bills.

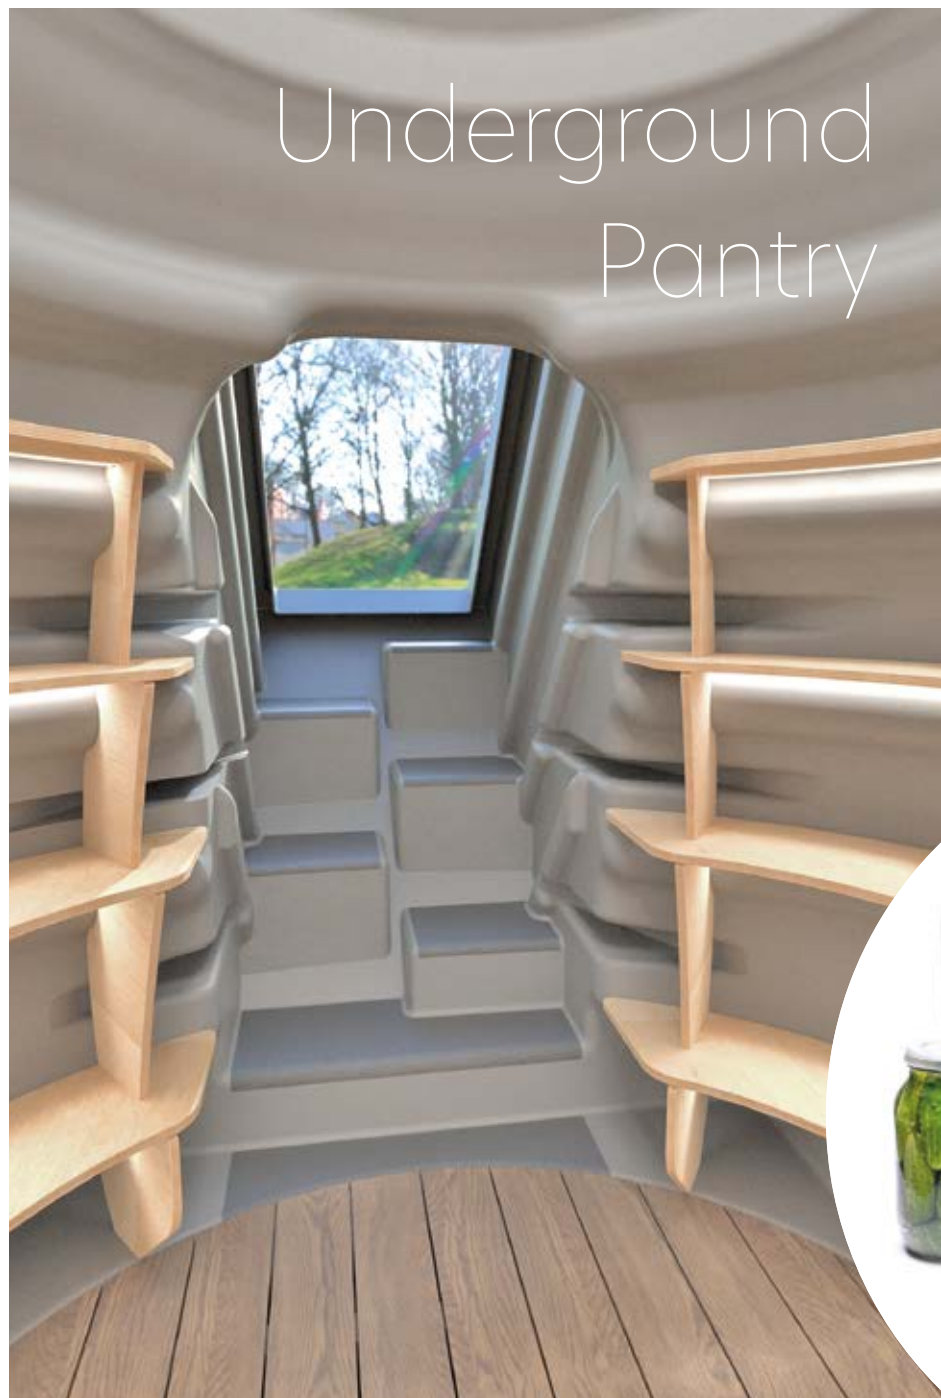

It is a great alternative for additional storage space for homeowners without a basement or pantry.

The assembly of the cellar is extremely simple and it takes about 5 hours to set it up. You need approx. 5m² of undeveloped space in your garden to install this modern dugout.

The material used in the production ensures high durability and resistance to moisture. Thanks to high tightness, it also prevents unwanted guests such as rodents from getting inside.

Gravity ventilation allows free air exchange and does not require any mechanisms to operate. Air exchange occurs under the influence of temperature differences.

Underground Pantry

constant temperature
regardless of the season

Through numerous functional shelves, the interior provides us with full comfort of use.

A specially dedicated wine shelf, which the cellar is equipped with, will allow you to store your favourite wines in ideal conditions.

An additional advantage is a place to store vegetables with the option of keeping them in the sand, which will significantly benefit their freshness and taste.

The double walls and lid ensure the perfect insulation and the optimum temperature, which makes Compothermo very efficient. Equipped with a convenient handle for closing the lid, and moveable flaps at the bottom, which provide constant to the ready fertilizer.

ideal for beginners

Ecocompo is a small, simple compost bin, ideal for beginners. It is water-tight and robust. The closed form prevents animals from accessing waste products stored inside, and the moveable flap at the bottom allows the ready fertilizer to be taken out easily to facilitate fertilization on an ongoing basis.

The improved design means that, when you do need to fill them, it's really easy. It has a large food storage for birdseed that can be poured through a hole in the roof. The original, streamlined shape will be an ideal decoration of any garden or balcony. It can be hung on a tree or attached using a tie cord strap to a balustrade or branch. The design also allows it to be placed on pile in the straight forward position anywhere in the garden.
