information

Each KISTENBERG product is crafted with a truly individual approach. Every component is carefully designed with close attention to even the smallest detail. Beyond their visual appeal, we place strong emphasis on practicality and performance.

Each item is assigned a dedicated colour profile to ensure perfect visual consistency across the range. All elements are assembled by hand with strict adherence to the technical specifications, resulting in products of outstanding durability and quality.

Kistenberg offers its range to professionals, specialists, and hobbyists alike – ensuring that every user, regardless of their level of expertise, finds exactly what they need.

modular systems

Kistenberg's modular systems have been developed for professionals, specialists and advanced hobbyists who require durable, functional and flexible solutions for organising their work. All components within each product line are fully compatible, allowing users to create configurations tailored to their individual needs.

The module bodies are made from a blend of polyamides and ABS, while the transparent elements are manufactured from polycarbonate, ensuring high impact resistance and structural stability. Most products meet the IP55 protection rating, safeguarding contents against water and dust. Reinforced construction, axles and the wheel system ensure smooth transport and safe operation even under heavy loads.

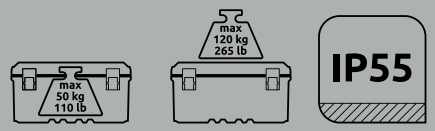
Additionally, thanks to Kistenberg's specially engineered adapters, all components can be connected across different product lines, including a range of modular organisers, significantly expanding the configuration possibilities of the systems.

Discover Kistenberg three modular lines – explore the differences and choose the system that suits you.

X BLOCK – The Most Extensive Modular Toolbox System

X Block is designed for professionals who require the highest durability and reliable organisation in demanding working conditions. The series combines reinforced construction with advanced sealing solutions to ensure long-term performance in the field.

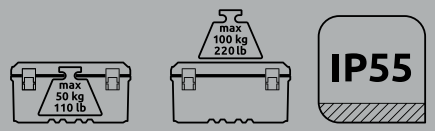
- Exceptional strength – withstands up to 120 kg of pressure and 50kg capacity
- Reinforced bodies and lids with sealing for dust and water resistance - IP55



C BLOCK – the compact version of modularity

Combines a sturdiness and robust construction with a compact, user-friendly size. Interlockability with series X-Block and range of organisers CMX, makes it the most practical organisational line for efficient daily use.

- Pressure resistance up to 100 kg and 50 kg capacity
- Sealed lids providing dust and water protection - IP55
- Double connector enabling broad cross-compatibility with other series



Modular Solution

Modular Solution – a system for hobbyists who value organisation and functionality

The Modular Solution series is built for users who need a complete, versatile storage set that supports clear organisation and easy transport. It offers a well-balanced combination of durability, load capacity and internal configurability for a wide range of tools.

- Variety of module choices to fit the set to every need.
- Up to 100 kg pressure resistance with high load capacity
- Functional internal accessories for flexible arrangement of space

C Block PRO Wheelbox System

High-capacity transport. Professional modular control.

The C Block PRO Wheelbox provides robust mobility and organised storage for heavy-duty applications. With deep trays, removable holders, metal hinges and IP55-rated sealing, the system ensures secure transport, excellent protection and long-term reliability on demanding job sites.

IP55 sealing for dust and water IP55 sealing for dust and water protection. Deep storage trays and removable tool holders, metal hinges & ABS latches for high durability.
Modular stacking compatible with any PRO and ALU LOG configurations.

C Block PRO

tidy lid, strong structure

C Block PRO
Reinforced interior and deep storage space, designed to hold larger tools and maximise internal capacity.
Compact, impact-resistant construction ensures durability and stable modular stacking across the PRO system.

C Block ALU LOG

powerful internal space

C Block ALU LOG
Integrated lid organiser with removable boxes, enabling clear separation and quick access to small components.
Lightweight yet robust modular structure, combining efficient organisation with reliable on-site protection.

toolboxes and organisers

Our tool organisers and toolboxes have been created for everyone who values order and convenience — from professionals and hobbyists to specialists across various fields. They combine durable materials, thoughtful design and practical features that make everyday work easier, whether you're operating in a workshop, at home or out in the field.

Clear lids, secure latches, ergonomic handles and the ability to customise the internal layout ensure that every component has its place. Thanks to modular systems and cross-series compatibility, you can effortlessly build a set that grows alongside your projects.

This is more than storage — it's an intuitive system that enhances organisation, boosts efficiency and gives you complete control over every task.

workshop equipment

Efficient work begins with a well-planned space. Kistenberg tool boards allow tools to be arranged in a clear and easily accessible way at all times. Thanks to their modular design and a wide range of pegs, hooks and holders, the layout can be individually adapted to the type of work performed and the tools used. Hanging systems enable the ergonomic arrangement of hand tools, accessories and small components, increasing working comfort and reducing the time needed to locate them. Secure fixings and durable materials ensure safe use even under intensive working conditions.

The range also includes sawhorses and workshop buckets, which, when combined with dedicated accessories, make it possible to independently create a functional workshop space. This flexible solution allows the workstation to be adapted to current needs — both in terms of working height and the organisation of the working area.

The system is complemented by organisers and storage containers that help maintain order among small items. Kistenberg solutions form a coherent workshop organisation system — from the wall and the worktop to every detail of everyday work.
