Showroom

We invite you to visit our Showrooms – spanning over 1,000 m² and showcasing the full breadth of the Prosperplast family of brands: Prosperplast, Ferne, Ethick, Waterform, Arves and Kistenberg. Our thoughtfully designed, minimalist interiors feature dedicated spaces for each product category, making it easy to explore our extensive assortment. Our team of specialists is on hand to support you and your customers at every stage. We look forward to welcoming you.

We set new trends

Prosperplast's mission is to create products that are practical, purposeful and visually refined. Our designs are consistently aligned with the latest global trends, helping to set new benchmarks for homes and gardens. As design pioneers, each of our product lines balances form with function – delivering elegant, everyday solutions for modern living.

prosperplast.pl

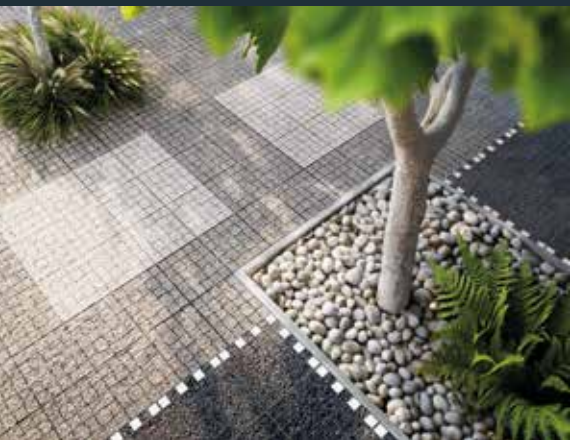

Over 33 years of expertise. Products built to perform. Prosperplast was founded on a simple principle: that well-designed, durable products can meaningfully improve everyday life. More than three decades later, that principle continues to guide everything we do.

We manufacture using three core technologies — injection moulding, blow moulding and rotational moulding — giving us the versatility to develop products of consistent quality at every price point. Our portfolio spans homes, gardens, storage and beyond, serving retail partners and distributors across global markets.

We don't follow trends. We set them.

This catalogue represents our current offering — the result of continuous investment in design, engineering and manufacturing excellence. We look forward to growing together.

beton

Beton Effect Collection Line is a line of planters whose forms and shapes also include models known from the Regular collection line, enhanced with a decorative finish inspired by concrete texture. Its distinctive surface gives each piece a modern, raw yet elegant appearance. A variety of sizes and versions makes these planters easy to match with interiors, terraces, and gardens. It is an ideal choice for lovers of minimalist design and contemporary spaces.

Sierra Case Beton Effect is a modern, elongated rectangular flowerpot with an internal partition dividing the space into two sections. Designed for creating arrangements and separating areas on terraces or balconies, this flowerpot features a stacking system. Perfect for outdoor and indoor decoration, it comes with internal liners for easy plant repotting and water drainage. Special wheels at the base facilitate the transportation of plants or the entire arrangement.

Easy module interconnectivity.

Madera Square Wood is a modern, square flowerpot in the shape of a cube, designed for creating compositions and delineating areas on terraces and balconies. Specially designed features facilitate the stacking of planters. It is ideal for decorating outdoor and indoor spaces such as restaurants, shops, or offices. It comes with an internal liner for easy plant repotting and water drainage, while special wheels aid in transporting tall plants or entire arrangements.

Madera Case Wood is a modern rectangular flowerpot with an internal partition dividing the space into two parts. Designed for creating compositions and separating areas on terraces and balconies, it features a stacking system. Suitable for decorating outdoor spaces like balconies, gardens, as well as indoor settings such as restaurants, shops, or offices. Equipped with internal liners for easy plant repotting and water drainage. Wheels at the base facilitate plant transportation. The distinctive structure, inspired by natural wood, resembles a wooden crate, while the design can mimic a wooden partition.

Easy module interconnectivity.

wall-mounting system

A round flowerpot with vertical rounded grooves and a classic cylindrical form. A visible cut at the narrow base creates a subtle ring effect. Understated, muted tones integrate seamlessly into modern arrangements.

A wall-mounted flowerpot with vertical grooves and a discreet mounting system. A suspended, lightweight appearance that maintains decorative appeal in both indoor and outdoor settings.

IKSH3S*	226	170	306	~125÷160
IKSH3M**	386	215	406	~180÷220

S411

A geometric metal wall hanger for flowerpots. Available in triangular, diamond and oval forms. A striking architectural accent for indoor and outdoor wall displays. Compatible with flowerpots sized 125–360 mm depending on design.

*Recommended flowerpot size 125–160 mm, depending on design

**Recommended flowerpot size 180–220 mm, depending on design

A modern system of vertical gardens brings an extremely attractive aspect of nature into any interior or exterior space. Modular systems attached to the walls in various configurations create spectacular displays — ideal for retail environments, offices, hotels, restaurants and residential spaces. Available in a hanging version and a portable version with a drainer. Thanks to the flow-through irrigation system, the plants are evenly supplied with water. Its excess is discharged to a saucer or drainer.

For home. For garden.
For life.

vertical garden & pergola

Garden Wall

	mm	mm	mm	
I02W600W	670	177	570	12 x 0,75

S433

A modular wall-mounted system that brings the beauty of vertical gardens into any interior or exterior space. Configurable in a wide range of arrangements to suit any wall surface. The flow-through irrigation system ensures even water distribution across all modules, with excess water discharged to the saucer.

modular & portable flowerpot system

Garden Floor

	mm	mm	mm	
I02W600S	685	190	546	12 x 0,75
S433				

A freestanding modular system for creating striking vertical garden displays — a contemporary way to introduce natural elements into any interior or exterior setting. Configurable in a wide range of arrangements. The flow-through irrigation system ensures even water distribution, with excess water discharged to the drainer. Water distribution system sold separately.

vertical garden & pergola

Create your own unique composition and add more modules!

A modular wall-mounted system with an elongated rectangular form, designed for creating dramatic vertical garden displays. Fully expandable — additional modules can be added to build larger configurations. The flow-through irrigation system ensures even water distribution, with excess water discharged to the saucer.

405U				S433

bloma

A set consisting of a spacious rectangular flowerpot and a detachable pergola. The pergola comprises five parts and connectors, forming a decorative support structure for climbing plants. A stabilising brace is included to reinforce the assembly. Ideal for terraces, balconies and gazebos — functions effectively as a freestanding dividing screen. Suitable for growing ornamental plants and vegetables including peas, tomatoes and cucumbers.

The flowerpots have special recesses, allowing them to be arranged one on top of the other, creating an interesting tiered effect.

The series of Crown rail planter boxes is very easy to attach to the balcony thanks to the recess in its base and special brackets, which guarantee stability. Resistant to sunlight and mechanical damage. Adjustable to different railing types.

Agro balcony case of a rectangular shape and subtle pressed markings on its surface is a universal product, perfect for the cultivation of various plants: flowers, herbs or vegetables. It may be mounted on balcony railings or placed on the floor or a window sill.

massive

Massive Collection is a range of planters with reinforced construction, where contemporary design meets refined functionality. Many models feature a practical removable liner that supports optimal water and moisture balance while creating comfortable conditions for healthy plant growth. Distinctive forms, elegant proportions, and carefully crafted textures give the collection a sophisticated modern character. Massive is design created for demanding spaces.

UV - and frost-resistant flowerpot with an elegant texture. Includes a liner which reduces the amount of soil needed. Self - watering system is optional.

A contemporary flowerpot with a modern cylindrical shape narrowed at the base. Its elegant proportions make it a perfect match for many interiors, especially those decorated in boho style. Equipped with an insert, it does not require full filling with soil. Thanks to the handles, you can easily remove the insert and gain access to the inside of the flowerpot.

A miniature, portable greenhouse or original box with legs made of hard, light-coloured wood. Equipped with a transparent lid with adjustable ventilation openings. A combination of functionality and timeless elegance.

plant herbs to enjoy
totally fresh each day!

The portable seedling collection from the Respana range offers a practical solution for growers facing difficult climatic conditions. This miniature greenhouse which, does not take up much space at home, creates the perfect conditions for the growth of the seedlings through good ventilation and humidity control. Cultivation of early vegetables, herbs or warm weather-loving plants sensitive to weather conditions - can be continued regardless of weather condition outside and bringing a great joy of early harvest. The light transparent lid provides adjustable ventilation holes in order to create an ideal micro-climate and prevent from overheating plants. What is more it protects the seedlings from annoying insects.

stackable

Bloomo is a portable, freestanding seedling nursery that provides ideal conditions for seedling growth. It features a detachable, transparent cover with adjustable ventilation openings and special safeguards to prevent accidental disassembly. There are openings in the cover to facilitate its transport. The nursery can be folded as it has removable legs.

Grow your gorgeous garden with absolute ease!

Botanic is a portable, freestanding seedling nursery that provides optimal growth conditions for seedlings. It features a transparent cover with adjustable ventilation openings and special locking mechanisms to prevent accidental disassembly. The cover is equipped with handles for easy lifting. This compact and lightweight greenhouse creates perfect microclimatic conditions, preventing plant scorching and shielding them from insects. An additional advantage is the ability to stack one product in another (stacking). Keep in mind that the greenhouse is not completely airtight, so it is not recommended to place it on a floor that may be exposed to moisture.

The Planti and Grower is ideal for sowing seedlings or direct seeding. It works perfectly for growing plants indoors. The openings at the bottom of the planter allow for controlled drainage of excess water. Made of durable material, it is designed for multiple uses.

Floos SUPPORTS

Floo Supports: Sets of various elements such as stakes, spirals, rings, crossbars, and clips that serve as support for plants in their growth. They stand out for their versatility in application, suitable for different types of plants and various locations like gardens, balconies, or patios. Functional sets offer diverse configuration options, allowing for flexible adaptation to plant needs or overall floral composition. Plant supports are easy to assemble and disassemble, allowing for independent assembly and modifications to the structure at any time. Thanks to their wide and deep anchors, they can be easily driven into the ground, providing stability for the climbing plant structure.

Elevate your plants to a higher level!

quick-water system

Thanks to innovative Gikabe quick-water system you don't have to waste your time on filling a bucket or watering can in a traditional way. All you have to do is press the button in the tank and the watering can or bucket will fill with water immediately.

GARDEN CELLAR

A garden cellar as an additional space for storing food, maintaining a stable, relatively low temperature.

The temperature conditions in the underground cellar make it possible to store preserves, fresh vegetables, as well as wines.

It is a great alternative for additional storage space for homeowners without a basement or pantry.

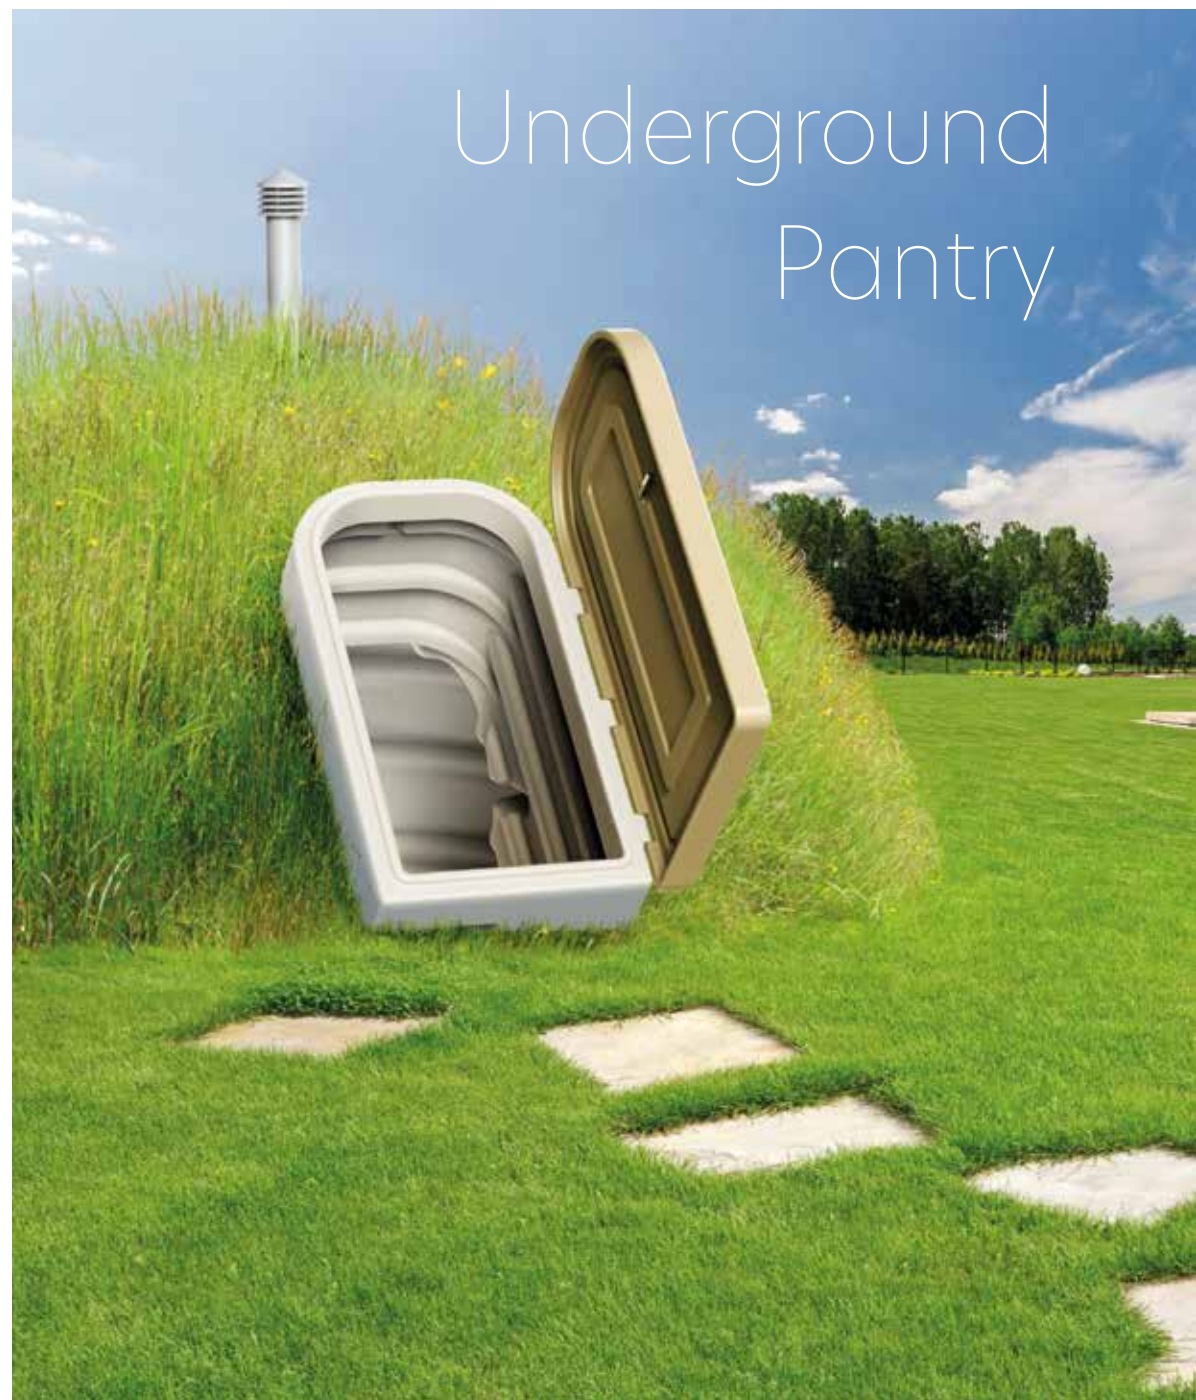

The assembly of the cellar is extremely simple and it takes about 5 hours to set it up.

You need approx. 5m² of undeveloped space in your garden to install this underground structure.

The material used in the production ensures high durability and resistance to moisture. Thanks to high tightness, it also prevents unwanted guests such as rodents from getting inside.

Gravity ventilation allows free air exchange and does not require any mechanisms to operate.

Air exchange occurs under the influence of temperature differences.

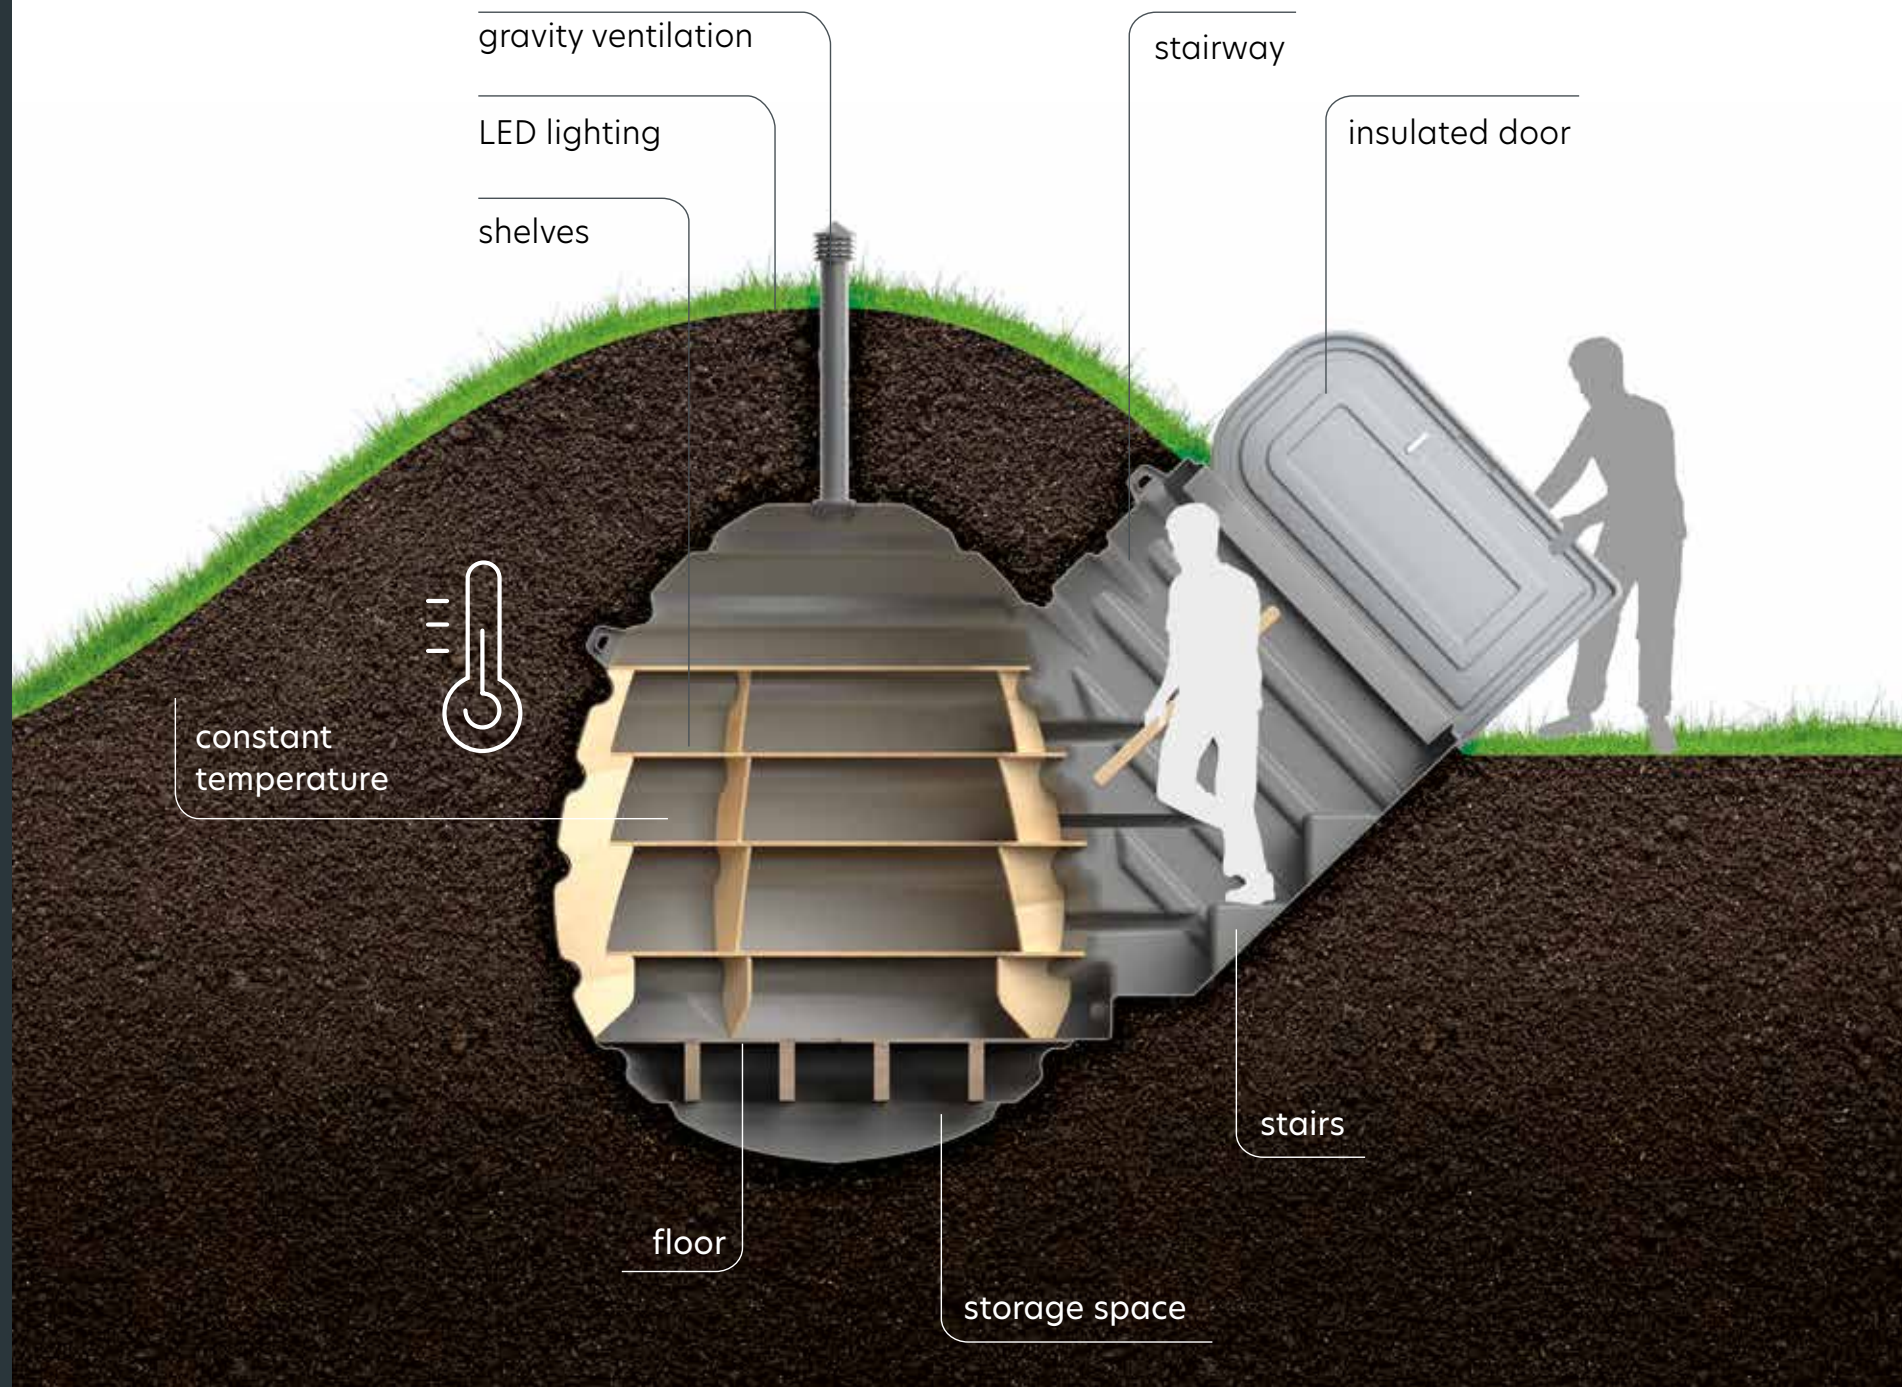

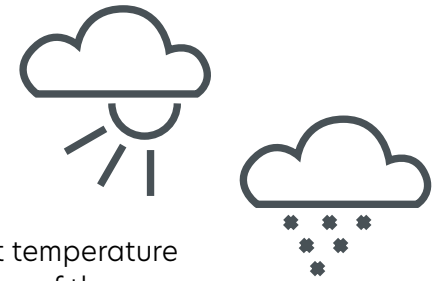

Ovo

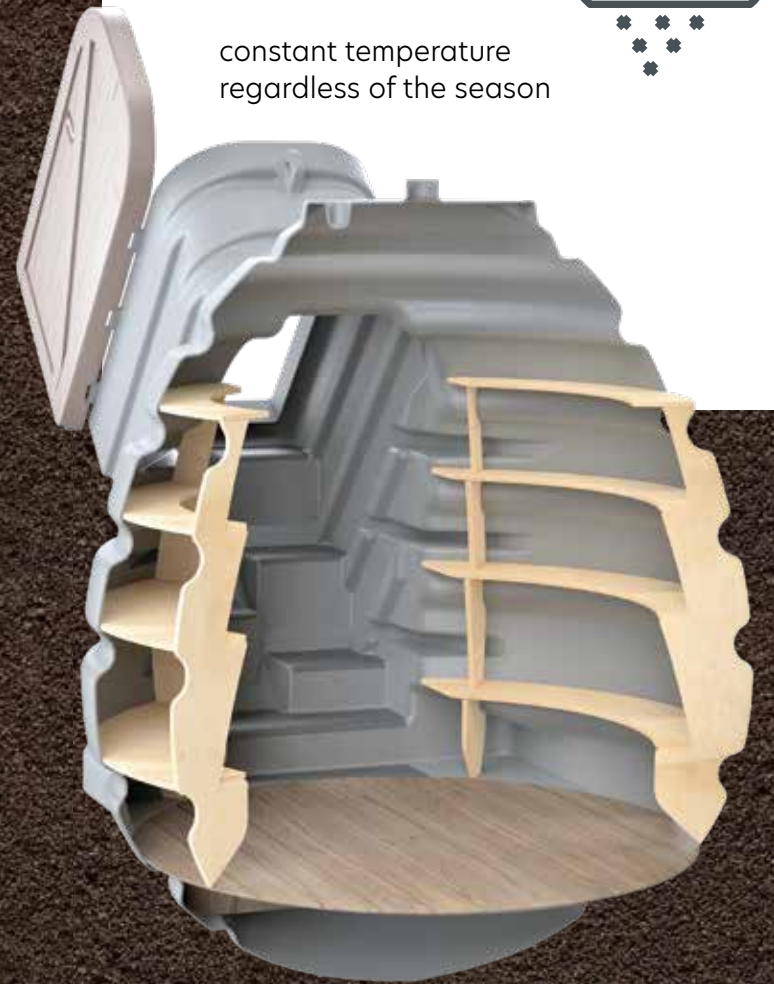

ROV	3570	2200	2600	7500,0

The Ovo cellar operates without energy consumption.

constant temperature
regardless of the season

The numerous functional shelves, the interior provides us with full comfort of use.

A specially dedicated wine shelf, which the cellar is equipped with, will allow you to store your favourite wines in ideal conditions.

An additional advantage is a dedicated vegetable storage area, with the option of keeping them in sand to preserve their freshness and taste.

Megastack

modular plastic shelving unit

Designed with order in mind.

top plugs
for aesthetic look

wall mountable
for secure storage

fast and easy
self assembly

feet for stability

A tried-and-tested solution for anyone looking to quickly and efficiently organise their terrace, balcony, garden or garage space.

The open-grid plastic shelves allow rainwater to drain freely and ensure proper air circulation — meaning the unit requires no maintenance whatsoever, season after season.

Tool-free assembly with no drilling required — ready in just 10 minutes. The modular design allows the unit to be expanded and adapted to suit the available space.

Ideal wherever additional storage is needed — both outdoors and indoors. Available in two variants: a 4-shelf and a 5-shelf model, tailored to a range of needs and spaces.

new Base Plant

Base Plant is a range of lightweight and functional mini garden beds designed for simple and visually appealing plant cultivation in a variety of outdoor spaces.

Made from durable composite material resistant to mechanical damage, UV rays and changing weather conditions, these beds offer long-lasting performance in open-air environments.

Easy to assemble without tools. The modular design allows for flexible configuration to suit different layouts and user preferences. Individual modules can be joined together to form larger, well-organized planting areas.

Available in four variants: rectangular and square mini beds, as single units or double sets — enabling free arrangement in gardens, on terraces or in urban outdoor spaces.

Compobox is a compact and easy-to-assemble compost bin consisting of elements that can be quickly connected without the need for tools.

The lid consists of two separate sections, allowing convenient disposal of organic waste. Both sections can be secured against accidental opening with the locker included in the set, protecting the compost bin from being opened by wind or animals.

The lower part of the compost bin features two access doors for convenient removal of finished compost. All modules are equipped with numerous ventilation openings that ensure proper airflow and help maintain optimal moisture levels for efficient decomposition of organic matter.

For added stability, the compost bin can be anchored to the ground using four fixing pegs. Both the pegs and the locker are attached to the underside of the lid and included in the set.
